THE ROSE WITHOUT THORNS

The first and only good thornless red hybrid Tea Rose. Truly the marvel of the age in Rose development. Brightest red color, will bloom six weeks after planting. Imagine cutting an armload of blooms and not having a single thorn to prick your fingers or arms. An everblooming Rose, producing fragrant double blooms from June until freezing weather. FESTIVAL THE \$10,000.00 ROSE. This amount was paid for patent and worth all of it. We guarantee your satisfaction. Try it in your garden.

EVERBLOOMING PEONY FLOWERING TEA ROSE—VIGOROUS AND HARDY

2114 "STRATFORD"

Originated from a cross between two historical Roses, the noted LaFrance and the beloved Marechal Niel. Named Stratford, commemorating the birth place of Gen. Robert E. Lee.

The color of the Rose is a lustrous pink, heavily shaded with salmon. The form is somewhat quartered, reminiscent of the Roses that probably grew a century or more ago in the gardens at Stratford, Virginia. Its blooms are intensely fragrant and borne on long stems, opening into large blooms so extremely double that there scarcely seems to be room for all the petals. \$1.50 each; 3 for \$3.90; 6 for \$7.50, postpaid.

Krider's Ten Commandments On Rose Growing

1st, Location. Rose bed should be in a sunny location and the soil should be of good garden grade and well drained. Fertilizer or well rotted manure should be thoroughly worked into the soil as the bed is spaded.

2nd, Care Before Planting. Unpack and plant Roses as soon as received from the nursery if at all possible. If you cannot plant at once, unwrap the plants and heel them in the ground until ready to set in their permanent places.

3d, Planting. In planting, set the plants with the bud, or joint, just above the roots, about 1 1/2 inches below the surface of the soil. Have holes large enough to avoid crowding of the roots and be sure soil used for filling in is finely pulverized. Tramp soil firmly a couple of times as the hole is filled and leave a slight depression around each plant to retain water. Allow 18 to 24 inches between plants when figuring the number of plants needed for a bed.

4th, Care After Planting. If some plants appear dead and refuse to leaf out within a reasonable length of time after planting, try covering them with a piece of wet burlap. Soak the burlap with water two or three times daily and leave over the plant 48 hours. This will make most of them start leafing very soon. Some varieties seem to be slower than others in starting and we find the the above method will sometimes literally bring out plants that appear to be brown and entirely dead. Try it, and you will be amazed at the results.

5th, Pruning. As soon as planting is completed see that all plants and the soil around them is thoroughly soaked with water. Cut back all canes to a length of 4 or 5 inches at planting time. This is very important as the root system of a newly transplanted Rose bush will not be able to leaf the canes to their entire length and many times plants will simply die in trying to do so. Each succeeding spring all canes should be cut back to the 4- or 5-inch height as stated above. This causes strong new growth and abundant bloom to develop.

6th, Fertilizing. Keep the Rose planting well watered at all times when there is no natural rainfall. A reasonable application of fertilizer applied twice during the summer months, with an interval of at least 30 days between applications, will induce added growth and extra quality in blooms.

7th, Cultivation. Frequent cultivation after planting will maintain a dust mulch on top of the soil which will conserve moisture and continue growth. Rather shallow hoeing gives best results and keeps the beds free from weeds. Keep soil loose this way until about Aug. 1, after which it is well to allow the stock to harden and mature for wintering.

8th, Spraying. For leaf spot and aphid apply Krider's Multi-Purpose Spray or Dust. Apply every two weeks or as often as needed. For slugs or leaf eating worms apply arsenate of lead.

Remedies for Chewing Insects. Leaf-eating insects such as beetles, weevils, grubs, worms, etc., are controlled by poison applied to the leaf. Arsenate of lead is most commonly used. Rotenone or pyrethrum should be used on vegetables. DDT is effective on some things, for instance, leaf-miners, chinch bugs in lawns, codling moths on fruits.

Combinations of fungicide and insecticide chemicals are time savers for the small garden. These materials come under various trade labels. Consult us and we will be glad to offer suggestions.

9th, Watering. Don't sprinkle beds—wet them thoroughly. If a hose is used, remove the nozzle and let the water soak into the ground until it is saturated for several days after good drenching like this. Water in the evening or early morning if possible.

10th, Preparation of Soil. Any soil that will grow good Potatoes or garden plants will grow good Roses. It is not necessary that the Rose bed be entirely of clay soil. Good, thoroughly enriched gravel soil, or loam soil, will grow as good Roses as clay. The only time it is desirable to add some clay is if the soil of the Rose bed is pure sand.

2143 HARDY MULTIFLORA ROSE PLANTS

**For Dense, Stock-Proof Living Flowering Fences,
also Farm Fences**

Most of you have no doubt read the articles appearing in various magazines recommending the Multiflora Roses for use on farms and suburban property. This is the type of Wild Rose understock onto which Hybrid Tea Roses are budded. It grows prolifically and is hardy in the most extreme situations. Seems to withstand cold and drought and thrive in poor soil. It is the answer to your search for something to make a living fence which will, when matured, be practically stock or trespasser proof. The branches grow spreading and tightly massed. Grows rapidly and quickly forms a dense fence or hedge. May be trimmed if desired. Plant 12 inches apart for a dense, tight fence or hedge; 18 to 24 inches apart for a property line fence or looser hedge.

Floribunda Roses Will Give Constant Summer Color

WHAT ARE FLORIBUNDAS?

Floribundas are an entirely different and distinct group of Roses. They are extremely hardy, doing well under the most adverse conditions. They are the most prolific of bloomers. Floribundas start blooming very early in June and continue to produce constantly until freezing weather. Their blooms are like the Hybrid Teas in form. They grow vigorously with canes from 20 to 30 inches in height. Floribundas are one of the best plants we know of for bedding and for borders. Their foliage is attractive and not easily subject to disease, and their constant blooming habit makes them desirable wherever a long and colorful flowering season is needed.

3434 NEW "MORaine" LOCUST

Plant Patent No. 836

AMERICA'S GREAT NEW SHADE TREE

Developed and introduced by Siebenthaler Company of Dayton, Ohio. The perfect answer to the demand for a clean, fast-growing, long-lived shade tree.

The MORaine LOCUST is a round headed tree when young but tall and vase-shaped when older. Mature trees attain a height of 80 to 100 feet with lower branches high enough to clear a two-story house. This feature permits planting the tree closer to the house than is the case with most other trees. Leaflets are small and in the fall they drift in between the grass blades on the lawn making very little raking or clean up. Very little pruning is needed as the lower limbs self prune as the tree grows. Tests show this new tree to grow more rapidly than either Silver Maple or Chinese Elm. It withstands drought and heat and cold. Thrives under adverse city conditions as well as on the plains where rainfall is slight. Excellent for either lawn or street planting. One of the best new tree introductions for American homes.

NICE 5- to 6-ft. TREES, \$6.00 each; 2 for \$11.00.

4134-"POOR MAN'S ORCHID"

IRIS SHILKA

Many years ago as a crowded, uncomfortable train puffed its way across the endless barren plains of Siberia, Prof. Hansen, an American passenger, was electrified by the sight of patches of what appeared to be Orchids blooming in that desolate region, near the small town of Shilka. As the train stopped at the station, Prof. Hansen left it to satisfy his curiosity. When he made a closer inspection of the plants he found them to be of the Iris family, but their form and color so closely resembled the Orchid that he immediately thought of the descriptive phrase, "Poor Man's Orchid." He secured several of the plants and brought them home to America with him. Several years of propagation and development showed them to be perfectly adapted to our climate and they were placed on the market under the name of **Iris Shilka**, recalling the name of the small Siberian town where they were first found. **We offer nice field-grown plants, blooming size, 45c each; 4 for \$1.35, postpaid.**

TWELVE OF THE WORLD'S FINEST VARIETIES OF HARDY PERENNIAL PHLOX

DO NOT ALLOW YOUR PHLOX TO GO TO SEED—This is Very Important

Keep blooms cut as they fade. If you permit plants to go to seed they will drop hundreds of seeds right around the base of the plant. Next year masses of seedlings will spring up. These usually have the old magenta color and soon kill out your true variety. This soon makes the bed a mass of seedlings.

THREE SUPERB PERENNIAL EDGING OR DWARF HEDGE PLANTS. All Are Hardy

4169 TEUCRIUM - Beautiful Perennial Hedge or Edging

Ideal for all edging work, or for low border hedges. Foliage is evergreen for ten months of the year and plants stay dwarf. Ten to fifteen inches is as high as they grow and an occasional very light trimming will hold their beautiful compact shape.

Hardy in all sections of the country and thrives in most any location. Ideal in front of low walls.

Should be planted 6 inches apart for a dense hedge. Note how effective Teucrium is when edging a perennial bed as illustrated.

Four to five plants in a group will make an ideal corner clump for a perennial bed or the corners of a Rose garden.

Don't fail to get some of these plants for that dwarf hedge you've been wanting.

**35c each; 10 for \$2.50; 25 for \$4.50;
100 for \$17.50, postpaid.**

4170 IBERIS—DWARF HARDY CANDYTUFT

**EXCELLENT FOR FLOWERING EDGINGS—
ALMOST EVERGREEN**

One of the loveliest of the semi-dwarf plants. Foliage is almost evergreen, remaining green until almost New Years. Each spring the plant is covered so densely with white, snow-flake-shaped blooms that it really resembles a small mound of snow. Very hardy, easily grown and requires only average garden soil. Reaches only about 12 inches in height, which makes it invaluable for the foreground in perennial beds or for low borders.

**Nice 2-Yr. Plants, 40c Each; 4 for \$1.50;
10 for \$3.50; 25 for \$6.50, postpaid.**

4171 SEDUM "SPECTABILIS" OR "LIVE FOREVER"

One of the hardiest of all plants, it seems to thrive under the most difficult conditions. Withstands heat, drought, cold, and shallow, poor soil. Foliage is ornamental all summer long and the large, flat heads of clear pink blooms are produced on sturdy stems and in abundance. Plant ordinarily reaches 12 to 18 inches in height with bloom stems rising 10 to 12 inches above foliage during blooming season.

One of the greatest features of "Sedum Spectabilis" is its versatility. Use it as a flowering perennial in the foreground of the bed or border; plant it among low growing shrubs for increased foliage and color effects; set one plant in each of two pots or pails and use them on each side of the steps; place plants 12 or 16 inches apart in porch or window boxes; best of all is its extreme hardiness and the ease with which it can be grown.

**2-Yr., Well-Rooted Plants, 45c Each;

4182 SAPONARIA

**VINE-LIKE PERENNIAL FOR TRAILING OVER WALLS
AND TERRACES—FINE FOR ROCKERY—Not Pictured**

We like this the best of all the trailing plants. One main root but it throws out numerous tendril-like branches close to the ground. Foliage is a bright green all season and in spring the plant bears small bright pink blooms in abundance. An excellent plant to plant along the top of a wall where the trailing branches can hang over. **2-yr. field-grown plants, 40c each; 4 for \$1.25; 12 for \$3.00, postpaid.**

NOTE: The Silver Blue Pfitzer described below is similar to Green Pfitzer in habit of growth and in general appearance but foliage is a bright silvery blue in color.

5202 PFITZER JUNIPER

The well known, gracefully spreading, low-growing Evergreen with sweeping fronds of fresh green foliage. Very hardy and does well in sun or shade. Quite rapid in growth when once established. The spreading branches should be kept sheared to form a dense mass of foliage. Allow tips to grow to size desired and then keep in bounds by trimming. (See next page for other evergreens which do well in shade.) 12- to 15-inch spread, \$2.25 each; 2 for \$4.25, prepaid.

5213 SAVIN JUNIPER

Similar to Pfitzer but darker green. 12- to 15-inch spread, \$2.25 each; 2 for \$4.25, prepaid.

5205 SILVER-BLUE PFITZER JUNIPER

(U. S. Plant Pat. No. 422)

Imagine all the famous good qualities of the Pfitzer Juniper now combined with a beautiful new silvery blue color. Color is as intense and even as the Koster Blue Spruce. Entirely hardy in any section of this country. Grows a little more compact and has slightly finer foliage than the well known green Pfitzer. Otherwise habits are the same. 12- to 15-inch spread, \$2.50 each; 2 for \$4.75, prepaid.

5203 FASTIGIATA JUNIPER

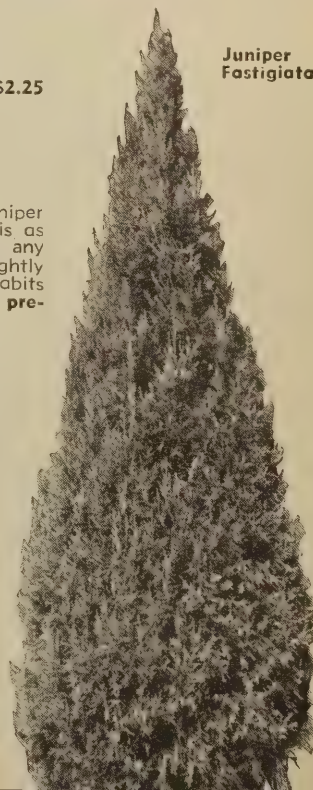

The New Columnar Juniper

Similar to Irish Juniper in foliage and color but grows tightly compact and columnar. The last word in Evergreens for doorways and formal effect. We have a nice stock of these in 18-inch size, the nicest size for transplanting, and offer them at only \$2.00 each; 2 for \$3.75, prepaid.

5204 NORWAY SPRUCE

A lofty, elegant tree of perfect pyramidal habit, rich in silvery green color. As the tree ages its branches become gracefully pendulous, making it exceedingly beautiful and picturesque. A splendid evergreen for specimen planting and also for windbreaks or backgrounds. 15 to 18 in., \$1.75 each; 2 for \$3.00, prepaid.

TO YOUR HOME AND SURROUNDINGS

Colorado Blue Spruce

5208 COLORADO BLUE SPRUCE

One of the hardiest and most beautiful of all evergreens for specimen planting. Should have plenty of room to develop its branches and stately form. Since Colorado Blue Spruce are grown from seed there is some variation in the blue shading, especially when the trees are young. Should be planted where they have plenty of sunshine to get best color effect. Very young trees are not particularly shapely but the typical symmetrical form comes as the plants grow to 3 feet or more in height. Due to scarcity of Blue Spruce, we can offer only **4-year, heavy transplants, 8-12 in., stocky plants at \$1.50 each; 2 for \$2.75, postpaid.** Buy several of them at this low price.

5209 JUNIPER HORIZONTALIS

(Andorra Juniper)

Very popular with those who want a prostrate creeping type for use along steps, for rockery planting or for use as a bank cover. Rarely exceed 10 to 12 inches in height. Richly colored foliage which blends well with any other plants used. We offer plants of **12- to 15-inch spread at \$1.75 each; 2 for \$3.00; 6 for \$8.25, prepaid.**

Juniper Horizontalis

5206 Pyramidal ARBOR-VITAE

For foundation or group planting in all landscape work. Retains the flat foliage and lovely bright green color at all seasons. Grows compact and develops naturally into perfect pyramidal form. May be sheared for strictly formal effects. **18- to 24-inch, \$2.00 each; 2 for \$3.75, prepaid.**

5207 GLOBE ARBOR-VITAE

Grows densely compact in a dwarf, globular shape. Foliage is flat and deep green in color. Much used for formal planting and for low, evergreen hedges as they lend themselves admirably to shearing. May also be grown in tubs for use at formal entrances. **10- 12-in., \$2.00 each; 2 for \$3.75, prepaid.**

THE YEWS

Without doubt the Yews are among the finest and most luxuriant evergreens grown. They are extremely hardy, easy to grow, do well in shade, and harmonize with any other plants.

Globe Arbor-Vitae

Pyramidal Arbor-Vitae

5210 SPREADING YEW

The spreading variety throws out sweeping branches similar to Pfitzer Juniper. May be kept trimmed back to desired size or to fit allotted space. Foliage is a shade of deep green, soft to the touch and always fresh looking. May be kept sheared for a low hedge, allowed to grow its graceful wand-like branches for informal corner plantings or trimmed into compact shape for formal effects. After the plant is several years old, numerous red berries are borne close to the branches, remaining into winter. **Well rooted, 12- to 15-in., \$2.75 each; 2 for \$5.00, prepaid.**

5211 UPRIGHT YEW

General foliage characteristics same as the spreading variety described above, but grows in columnar, erect form. By keeping the plant lightly sheared as it grows, the foliage will be extremely dense and compact from the ground up. Valuable for corner plantings and accent pieces. Does well in shade and seems to be very little affected by disease or pests. **15- to 18-inch, \$2.75 each; 2 for \$5.00, prepaid.**

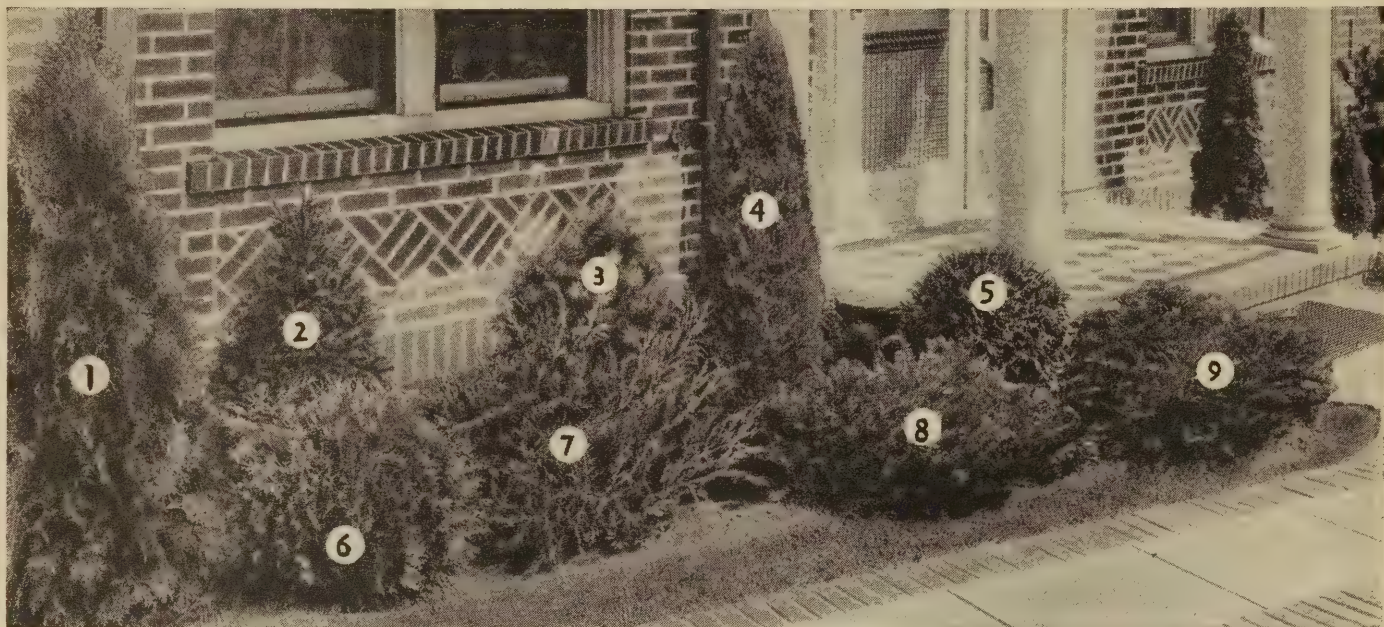

5212 DOUGLAS FIR

A lofty, elegant tree of perfect pyramidal habit of growth. One of the really fine evergreens for specimen planting. Has a beautiful bluish color similar to the Blue Spruce. However, the foliage is of a softer nature and growth is more rapid. Very hardy to withstand severe weather conditions and develops into a sturdy, valuable tree. **Well rooted, 15- to 18-in. trees, \$2.00 each; 2 for \$3.75, prepaid.**

NOTE: All evergreens are shipped prepaid.

In Memoriam

For twenty-five years this space in "Glories of the Garden" has been devoted to bringing an annual message from our founder, Vernon H. Krider, to his thousands of friends and customers.

This year it becomes the sad task of those of us who remain to write a few words of personal thanks and appreciation to all of you tens of thousands of wonderful folks who have meant so much to him and to us.

On the afternoon of February 3rd, 1955, after spending most of the forenoon at his desk answering letters and attending to other business matters, he complained of not feeling well. His long-time family physician (the President of our corporation), was soon with him and realized the seriousness of the attack.

As evening came and the shadows of twilight gathered, his Unseen Guide gently took him by the hand and said: "Come, I have found a pleasant place to cross."

And so he left us—rich in years, experience, friends, and the fulfillment of ambition in home, business and civic life.

That he had builded well is attested by the fact that the business he established and loved so much will continue in the same manner as it would be conducted were he still at his desk. Every employee, every member of his family and every associate here at the nursery is familiar with the high principles which he instilled into every avenue of his home and business life.

We who are left pledge the continuance of those same policies which have governed all of our dealings with our customers for the past sixty years, carrying in our hearts the words we heard him utter so many times—"Boys, always remember, the customer must be satisfied if at all possible."

In that spirit we face forward to the future

"He Went Down
As When a Mighty
Cedar Falls
And Leaves a Lonesome
Place Against the Sky."

*"As one by one the autumn leaves
fade in the forest deep,
So, one by one, to each of us must
come the touch of sleep;
As, one by one, the roses burst
into the morning light,
So, one by one, our souls shall
wake again beyond the night."*

Gentlemen:

I thought that you would be interested in knowing that my shipment of shrubbery, including Phlox and Peonies, arrived at Anchorage, April 28, having been post marked your town the 12th. The contents were in perfect condition, the plants having some new growth, and the packing was well moistened. I was most happy with the condition of these plants and feel that you should have no hesitancy in making shipments via parcel post (regular) to Anchorage, Alaska. Some nurseries think that we are a part of some foreign country and refuse to make shipment.

Very truly yours,
Mrs. S. J. A.
